## **Who We Are**

### **About Us**

Respite care provides a range of support and service options designed to assist families and caregivers in caring for a family member with a disability. Respite creates greater opportunities for all family members to live actively and participate in community activities and allows parent/guardians time for themselves.

Respiteservices.com provides an on-line worker database available to families to search for potential workers to support their family member with a disability

## Family Classifieds

Families who have a family member with a disability can register on-line. Families can post their worker needs through the family classifieds. Rygiel Supports for Community Living would then connect the families to potential workers who respond to the classifieds.

### Support Worker Database

Respiteservices.com holds a database of support workers. Workers registering in the site can create a profile detailing the worker’s experience, education and availability. Families can peruse the worker database and chose a profile that best suits their needs.

Respiteservices.com connects agencies funded by the Ministry of Community and Social Services and the Ministry of Children and Youth Services. In Hamilton, we are collaborating to develop a more dynamic respite network for both children and adults. In addition to representation from the developmental service sector, the group includes representation from the child welfare and mental health sectors
